

I take immense pleasure in recommending Mr. Darshan Umapathi to your prestigious institution for a Master's Program. As a Senior Associate Consultant at Infosys Limited India, I have had numerous opportunities to interact with and observe him in the last fifteen months that I have known him. I find Darshan to be a talented Software Engineer who has the eagerness to explore new things.

Darshan is an industrious person who invariably understands exactly what a project is all about from the outset, and how to get it done quickly and effectively. During his stay here, I haven't seen him miss a single deadline. As a member of the development team, he streamlined his tasks and worked in an efficient manner. He stayed around after work hours during the product release to carry out the testing and solve any immediate issue that may arise, thus helping out the deployment and testing teams. Garnering appreciations from the by customers and senior management for his endeavors, he made sure that the projects adhered to the budget allotted and a few were even completed ahead of schedule.

He is proficient in web development technologies like Java, python, JavaScript and also has developed a keen interest in learning and implementing Data science, Machine Learning, Deep Learning concepts and closely working on Computer vision applications. He demonstrated high level of problem understanding and analytical skills during the project he worked on, 'Data Integration for Unilever using Dell Boomi'. Moreover, his technical competency made him be a part of various technical events and workshops conducted by the organization like the Dell Boomi hackathon and Microsoft Azure workshop, 2019. He actively participated in the 'Zero Bench Initiative' by acting as a shadow resource and helping fresher's complete projects pertaining to different technologies.

Darshan will be an invaluable asset to any Institution, and I highly recommend his candidature for admission into your graduate program. Should you need more information about this recommendation, please contact me.

Sincerely,

Nitheesh Cherrikkal
